Comments

Joey Staubes , May 6, 2024

This sign permit is denied based on the non-compliance with the regulations established in Chapter 82, Section 15 of the Smyrna Code of Ordinances. The proposed sign exceeds both the maximum area (32 square feet) and maximum height (8 feet) specified by the ordinance, is not a ground based monument sign as required by the ordinance and is a pole sign as prohibited by the ordinance.

A formal response is attached.

Addendum to Sign Permit Application

1. Please note that the online permit submittal portal located at <https://smyrnaga.portal.opengove.com> did not offer an option that matches the type of sign requested. The proposed sign is commonly called a “freestanding sign” or an “off-premise sign.”

Note: All portions of proposed sign to be over 10 feet from any sidewalk, over 15 feet from the edge of the road if no sidewalk exists, and over 25 feet from any point where right-of-way lines intersect for two streets or roads. No reduction in parking.

Marietta, GA 30062

RE: Sign Permit: SIGN-24-74
0 Atlanta Rd
17044400280

The application for permit SIGN-24-74 is denied based on the non-compliance with the regulations established in Chapter 82, Section 15 of the Smyrna Code of Ordinances. The proposed sign exceeds both the maximum area (32 square feet) and maximum height (8 feet) specified by the ordinance, is not a ground based monument sign as required by the ordinance and is a pole sign as prohibited by the ordinance.

Due to the non-compliance with these standards established in Chapter 82 of the Smyrna Code of Ordinances, the sign permit is denied.

GENERAL NOTES

- All design, detailing, fabricating and construction shall conform to the following code and specifications:
 - ASTM A-36 (Current Edition), Steel (3018 Edition)
 - American Society of Testing and Materials (ASTM) specifications.
 - ASTM A-36 (Current Edition) for Reinforced Concrete (ACI 318-(Current Edition))
 - Code for Welding in Building Construction of the American Welding Society (AWS) (Current Edition)
 - Specification for Structural Steel Buildings by the American Institute of Steel Construction (AISC) (Current Edition)
- Concrete shall be 4,000 P.S.I. @ 28 Days (P.C.F.)
- Reinforcing Steel (Fabricated) shall be ASTM A-615 Grade 60. All bars shall be lap spliced and shall be free from mud, oil, rust or coatings that would reduce or destroy bond.
- All welding shall be by the Shielded Metal Arc Welding (SMAW) process. All welds shall be made in accordance with the AWS D1.1 (Current Edition) Code for Structural Steel Welding. All welds shall be made in accordance with the AWS D1.1 (Current Edition) Code for Structural Steel Welding. All welds shall be made in accordance with the AWS D1.1 (Current Edition) Code for Structural Steel Welding.
- Welding electrodes shall comply with AWS D1.1-(Current Edition), E70xx.
- Design Wind Speed= 110 MPH (0.9 G).
- Equivalent Wind Load= 22.2 PSF @ 45'-0" above ground level, 3 second gust.
- Soil Bearing Capacity Requirements: 5.0 G.P.S.F. @ 4'-0" depth. 10.0 G.P.S.F. @ 6'-0" depth. 15.0 G.P.S.F. @ 8'-0" depth. 20.0 G.P.S.F. @ 10'-0" depth.
- Contractor shall verify all dimensions and conditions in the field before erection and notify the Engineer of any discrepancies.
- Selling of open leading or solid diameter, and all shall be provided. A full penetration weld at ground level (ANSI D1.1) shall be used and shall be performed by a certified welder. Splice shall not be within one foot of the foundation upon which it is placed. Splice shall not be within one foot of the foundation upon which it is placed. Splice shall not be within one foot of the foundation upon which it is placed.
- The structure shown, as designed, is capable of supporting up to two (2) digital displays weighing up to approximately 4,725# each.

This drawing is for permitting purposes only, unaltered use prohibited.
