LANDSCAPE

## Front Entry Walkway

Before

After

Infill existing planting beds with Fire Chief Arborvitae, Jewel Box Distylium and Blue Zinger Sedge creating a welcoming feeling as you enter into the Library. Replace Blue Ice Cypress with a Blue Atlas Cedar providing similar color and texture, but without the size.

## Right Side Foundation

Before

Blue Atlas Cedars on either side of the main entry way frame the building and provide a focal point in the landscape. Emerald Green Arborvitae against the foundation break up the planting height and add additional scale. Hydrangeas, Loropetalum, Arborvitae, Camellia, Sedge and Ajuga all create an abundance of interest throughout the year.

## Right Side Foundation

Before

Arborvitae, Hydrangea, Distylium, Anise and Ajuga soften the foundation of the building and add character and interest to enjoy walking along the pathway.

## Right Side Walkway

Before

After

The most shaded side of the building requires a little different planting palette and an abundance of shade tolerant plant material. Hydrangeas anchor the planting area with Viburnum, Anise, Yew, Ferns, Lenten Rose, Hosta and Hakone grass all making up the ground plane planting. Low growing plant material allows for a more open feeling and comes with an abundance of texture and color.

## Left Side Foundation

Before

After

The left side of the building mirrors the planting from the right side using Arborvitae, Loropetalum, Hydrangea and Camellias. The “sunnier side” of the building allows for a different plant palate consisting of Viburnum, Dogwood, Camellias, Spirea, Sedge and Ajuga.
